

Why buy in bulk? Simple.

Big Savings!!!

The big-box home improvement stores are advertising “great” deals on bagged mulch.

One is selling 3 bags (2 cu. ft. ea.) for \$10.00 & the other is selling it for \$3.33 per bag (2 cu. ft. ea.).

Let's break it down:

There are 27 cubic feet in a cubic yard. You need 13-1/2 bags to equal just ***one cubic yard***.

At \$3.33 per bag, the equivalent of one cubic costs **\$44.96** plus tax.

At 3 bags for \$10.00, the equivalent of one cubic yard costs **\$45.00** plus tax.

*At Pete Rose, Inc., one cubic yard of our premium color-enhanced hardwood mulch is just **\$30.00** plus tax. And you don't have to deal with empty bags. Doesn't it seem silly to lovingly tend to your plants and yard, enriching the soil and beautifying the neighborhood only to haul dozens of plastic bags to the dump where it will take hundreds of years for them to biodegrade?*

Buying in bulk saves money and is good for the environment.

It's that simple.
